PROFESSIONAL SUMMARY

Christopher is a Development Economics graduate currently completing a Master of Science in Applied Data Science at LUANAR, with over two years of experience in economic data analysis, market data management, and evidence-based reporting. He has demonstrated ability to collect, process, analyse, and organise large datasets across economic and social development contexts, and to produce analytical reports and dashboards supporting regulatory and programme decision-making. Proficient in statistical tools including STATA, SPSS, Python, R, SQL, Excel, Power BI, and Tableau, he brings a strong foundation in econometrics, financial analysis, and ICT-adjacent market research directly relevant to MACRA’s Economic Regulations Directorate mandate.

CORE COMPETENCIES

- Economic and Financial Analysis:** Tariff analysis, market performance review, economic data interpretation, financial modelling, regression analysis
- Data Management and Reporting:** SQL database management, data cleaning, validation, dashboard design, Power BI, Tableau, Excel (advanced)
- Statistical Analysis:** STATA (advanced), SPSS (proficient), R (tidyverse), Python (pandas, NumPy, scikit-learn), descriptive statistics
- Research and Survey Methods:** ICT market surveys, quantitative and qualitative analysis, baseline studies, monitoring and evaluation, data quality assurance
- Communication:** Technical report writing, policy brief development, stakeholder presentations, cross-functional documentation

EDUCATION

Lilongwe University of Agriculture and Natural Resources (LUANAR) <i>Master of Science in Applied Data Science</i>	Lilongwe, Malawi <i>Pending Graduation</i>
- Relevant Coursework: Machine Learning, Big Data Analytics, Advanced Database Management Systems, Research Methods, Econometric Modelling - Academic Mentor (selected Oct 2025): supporting undergraduate students in quantitative research and data analysis	
Lilongwe University of Agriculture and Natural Resources (LUANAR) <i>Bachelor of Science in Development Economics</i>	Lilongwe, Malawi <i>Nov 2019 – May 2024</i>
- Relevant Coursework: Econometrics, Financial Accounting, Statistics, Research Methods, Public Economics, Development Economics - Thesis: <i>Media and Demographic Factors Influencing Women’s Demand for Private Health Insurance in Malawi: Evidence from the 2019 Malawi DHS</i> – applied economic demand analysis using DHS survey data	

PROFESSIONAL EXPERIENCE

Junior Data Scientist <i>The Pangolins</i>	Aug 2025 – Present <i>Hybrid (Blantyre/ Lilongwe, Malawi)</i>
- Collect, process, analyse, and organise data from multiple sources to support business performance monitoring and decision-making – directly comparable to managing ICT market indicator databases - Design and maintain SQL databases and ETL pipelines ensuring data accuracy, consistency, and integrity across operational systems - Build interactive dashboards and reports using Power BI and Tableau, translating complex analytical outputs into clear management insights - Conduct financial and operational risk analysis using Python and statistical modelling tools, producing quarterly analytical reports for senior stakeholders - Write technical documentation and SOPs; maintain data governance standards aligned with compliance requirements	

Research Associate Intern

Institute for Rural Development

April 2026 – Present

Lilongwe, Malawi

- Assist in conducting economic and programme performance reviews, collecting and analysing market and community-level data to inform regulatory and programme decisions
- Develop structured analytical reports synthesising large datasets for management and donor stakeholders
- Support monitoring and evaluation activities, tracking programme indicators and preparing performance review documentation

Data Collection Officer

Malawi National Social Registry Project, Makoka and Associates

Aug 2025 – Nov 2025

Lilongwe, Malawi

- Collected, processed, and organised large-scale household socioeconomic data across rural districts, ensuring data accuracy, completeness, and consistency
- Conducted systematic data cleaning and validation prior to submission, maintaining dataset integrity throughout the project lifecycle
- Coordinated field teams and applied data collection protocols consistently across diverse operational environments

Research Assistant – SMARTEX Project

LUANAR Directorate of Research and Outreach

July 2024 – Dec 2024

Chikwawa, Malawi

- Collected, processed, and organised large-scale household data across irrigation schemes participants, ensuring data accuracy, completeness, and consistency
- Conducted systematic data cleaning and validation prior to submission, maintaining dataset integrity throughout the project lifecycle
- Coordinated field teams and applied data collection protocols consistently across diverse operational environments

TECHNICAL SKILLS

Statistical and Analytical Tools: STATA (advanced), SPSS (proficient), R (tidyverse, caret), Python (pandas, NumPy, scikit-learn), SQL

Reporting and BI: Power BI, Tableau, Excel (advanced), data dashboarding, automated reporting, data visualisation

Database and Data Engineering: SQL database management, ETL pipeline design, data cleaning, data quality assurance, metadata management

Research Methods: Economic analysis, market surveys, questionnaire design, regression analysis, monitoring and evaluation, policy analysis

CERTIFICATIONS & TRAINING

Research Data Management Course – Elwazi OpenData Platform (2025). *Focus: Data governance, compliance, metadata standards*

Data Collection and Machine Learning Workshop – LUANAR (March 2025)

Data Science Hackathon Participant – LUANAR (February 2025)

Bayer Safe Use Ambassador Program – Bayer (2024)
